Introduction:

Banpu Power will do business with a strong reputation for sustainable development, friendly community relations, and respect for the natural environment. BPP not only recognize that our business operations impact on the environment, but also believe in positive thinking and attitude towards environmental benefits for all. BPP are committed to taking an environmentally responsible approach to all our business activities.

Objective:

- 1) Minimize the negative effects
- 2) Enhance the quality of environment whenever reasonably practicable
- 3) Conserve natural resources

Scope:

This policy shall be integrated and applied to BPP and our subsidiaries where BPP has management control and will make assessment during due diligence process for investment, mergers and acquisitions.

Moreover, the policy should be promoted to our joint ventures and throughout supply chain especially suppliers, services providers and contractors who work within our operating assets.

Banpu Power shall establish measurable indicators and Quality Assurance Review (QAR) system to monitor and review performance to ensure that the policy’s goals and targets will be achieved. HSEC Corporate would conduct QAR with country in every operation once in every two years.

Policy Statement / Principles:

- 1) We are 100% compliant
 We fully comply with all relevant current environmental legislation and company standards as well as monitor developments and prepare ourselves for potential changes.
- 2) We ensure the continual improvement
 We provide sufficient resources to develop and maintain the environmental management system with the aim of continually improving our environmental performances.
- 3) We assess and monitor about risk related environmental issues
 We integrate risks management principles in every process of our businesses and develop the mitigation measures for each significant risks to prevent or reduce its impact.
- 4) We manage environmental impacts
 We ensure that substances or activities posing a threat to environment are prevented from adversely affecting the environment and perform environmental impact assessment for all operational activities. Key performance indicator, objectives and target will be set to reduce environmental risks and impacts.
- 5) We conserve resources and efficiently use
 We manage resources (specially; energy, water, and land) efficiently.
- 6) We build up employee capacity
 We ensure sufficient resources for training our employees and contractors to understand the impacts of their work activities on the environment and protection and mitigation measurement
- 7) We ensure sufficient resources for measures, disclose and communication
 We communicate environmental objectives, targets and performance to raise internal/external stakeholders' awareness of environmental management policy and impacts, as well as to encourage participations.

Responsibility:

- Management in all levels must hold accountability and take leadership in deploying this policy.
- Management in each country shall develop local related policy which align with this policy.
- Every employee must be made aware of, promotes and implements this policy.
- Every employee is expected to extend the awareness and recognition of this policy to our partner, suppliers, contractors, subcontractors, customers and the communities in which we work.
