# **Report of the Board of Directors' Responsibilities for the Financial Statements**

The Board of Directors has placed top priority on supervising the Company's operations to ensure their compliance with good corporate governance policy and overseeing the accuracy, completeness, and adequacy of financial statements and financial information appearing in the 56-1 One Report 2024. It also has a responsibility to ascertain that the financial statements are carefully prepared in strict compliance with Thai Financial Reporting Standards, which is based on the International Financial Reporting Standards. In addition, the Board of Directors must establish and maintain an effective internal control system to ensure the reliability of its financial statements. The Board has to safeguard the Company's assets with a good protection system to prevent corruption or suspicious operations. Connected transactions which can give rise to possible conflicts of interest are closely monitored to ensure that they are genuine transactions and are reasonably carried out based on the ordinary course of business for the Company's maximum benefits and in compliance with relevant laws and regulations. The Audit Committee has already reported the result of its activities to the Board of Directors, and its opinions in the Audit Committee's Report are included in the 56-1 One Report 2024.

The Board of Directors is of the opinion that the Company's internal control system has been proved to be satisfactory. The Board was able to obtain reasonable assurance on the reliability of the consolidated financial statements as at 31 December 2024, which the auditor conducted an audit in accordance with Thai Standards on Auditing. The auditor is of the opinion that the financial statements present fairly the financial position and the results of its operations and cash flows in conformity with Thai Financial Reporting Standards.

(Assoc. Prof. Dr. Naris Chaiyasoot) Chairman of the Board of Directors

(Issara Niropas) Chief Executive Officer

#### Financial Report 2024

# **Report of the Audit Committee** to Shareholders

The Audit Committee of Banpu Power Public Company Limited consists of three independent directors who are competent and have relevant experience in finance and accounting, economics, risk management, chemical science, and energy business as follows:

| 1. Mr. Yokporn Tantisawetrat        | Chairman of the Audit Committee |
|-------------------------------------|---------------------------------|
| 2. Assoc. Prof. Naris Chaiyasoot    | Member of the Audit Committee   |
| 3. Prof. Dr. Patchanita Thamyongkit | Member of the Audit Committee   |

Ms. Nachanok Trairatwaroon serves as the Head of Internal Audit and the Secretary of the Audit Committee.

The Audit Committee is fully aware of its duties and responsibilities stipulated in the Audit Committee Charter. as well as other duties entrusted by the Board of Directors. In 2024, the Audit Committee reviewed the Audit Committee Charter to align with the Securities and Exchange Commission (SEC) circulars on the duties, responsibilities, and best practices of the Audit Committee to prevent misconduct of listed companies. The Audit Committee has prudently and independently performed its duties under its charter, ensuring equal benefit for all stakeholders and focusing on sustainable value creation for the organization.

In 2024, the Audit Committee convened twelve times and a guorum was established with the participation of the management, Internal Audit, and external auditors on the related agenda. The Audit Committee also held a private meeting with the external auditors without the presence of the management. The results of the Audit Committee meetings were quarterly reported to the Board of Directors. The Audit Committee's main activities can be summarized as follows:

- 1. Review of Financial Statements: The Audit Committee reviewed BPP's guarterly financial statements and the 2024 annual financial statements on major issues, including related party transactions, transactions with a possible conflict of interest, and the appropriateness of accounting policies. The Committee also reviewed material accounts, significant changes in accounting and adjustment, accounting estimates, the disclosure of notes to the financial statements, and the external auditor's observations from the review and audit of the financial statements. The Audit Committee received sufficient explications from external auditors, management, and related parties and ensured that the financial statements were prepared in compliance with laws and financial reporting standards. The disclosure of notes to the financial statements was accurate, sufficient, and timely for the benefit of investors and users of the financial statements.
- 2. Review of Internal Control and Internal Audit: The Audit Committee reviewed the internal control system together with the Internal Audit Unit in the areas of operations, resource utilization, asset care, prevention or reduction of mistakes, damages, and corruption, reliability of financial reports, compliance with laws, regulations, and rules, improvement of the corporate governance process, risk management, internal control, and oversight of compliance with relevant regulations. The Company encouraged improvements in governance processes, risk management, internal controls, and regulatory compliance. Moreover, it supports the management in overseeing IT governance and cybersecurity. The Committee prioritized employee awareness-raising to promote adherence to prudent and cautious internal control practices. The Committee also reviewed the overall internal control system by considering the results of self-evaluation based on the Self-Evaluation Form developed by the Office of the Securities and Exchange Commission (SEC). Overall, the Audit Committee concluded that BPP had an adequate, appropriate, and effective internal control system that encompasses both the corporate and activity levels. The Audit Committee oversaw the Internal Audit Unit's activities,

including approving the annual audit plan and budget and evaluating the Head of Internal Audit's performance. Moreover, the Committee advised and supervised internal audits and the performance of the internal audit service provider (Banpu Public Company Limited, according to the Management Service Agreement) in accordance with the audit plan, focusing on preventive audit measures and ensuring timely corrective actions for significant issues. Internal audit results and follow-ups were regularly reported to management and presented to the Audit Committee on a guarterly basis.

- compliance principle and covering both high-level processes and end-to-end core operations.
- (SET) and the Office of the Securities and Exchange Commission (SEC).
- ventures, to enable efficient management and mitigation of risks across the organization.

6. The Appointment of the External Auditor and Determination of the Audit Fee for 2025: The Audit Committee considered the selection of external auditors based on the evaluation criteria set by the Company based on independence, timeliness, quality, professional standards, and reasonable audit fees. As a result, the external auditors' qualifications met the Stock Exchange of Thailand's requirements. For 2025, the Audit Committee proposed the appointment of auditors to the Board of Directors for consideration and submission to the 2025 Annual General Meeting of Shareholders for approval. The following individuals were nominated:

3. Review of Legal and Regulatory Compliance: The Audit Committee reviewed the legal and regulatory compliance of BPP's business operations and policies. The Corporate Compliance Department is responsible for auditing and monitoring legal and regulatory compliance, and it regularly reports compliance issues and monitoring results to the management and the Audit Committee. In addition, the Company reported risk management and internal audit results covering key compliance risks. In 2024, the Company updated its Group compliance documents, which establish standard practices across all countries, incorporating the Three Lines Model for risk management. The Committee also provided guidance on legal compliance operations to various units and developed a regulatory Compliance Obligation List (COL). This list outlines the necessary activities for each unit to ensure legal compliance, aligning with the activity-based

4. Review of Related Party Transactions: The Audit Committee reviewed related party transactions and those that could pose conflicts of interest between the Company, its subsidiaries, and other related parties. The Committee adhered to the related party transactions policy as a guideline, ensuring that all transactions were conducted on an arm's length basis. This approach safeguarded fair conditions, protected the interests of the Company and its stakeholders, and prevented any transfer of undue benefits. In addition, all transactions were required to be fair, reasonable, and compliant with the regulations of the Stock Exchange of Thailand

5. Governance of Risk Management System: The Audit Committee reviewed the efficiency and effectiveness of the risk management process and monitored key risks that may have posed threats to the Company's business operations. This includes risk management in Cybersecurity and other information technology-related risks in the overview of the organization as well as Environmental, Social, and Governance (ESG) risk management. The Audit Committee also quarterly monitored the progress of management of key risks and changing situations which affected the operations. The Audit Committee has established mitigation measures, emphasizing systematic and sustainable management, to timely respond to rapidly changing business scenarios and trends. There is a clearly written policy on risk management as stipulated in the Risk Management Policy and the Charter of Risk Management Committee, which was approved by the Board of Directors. The Committee convenes regular meetings to assess risks. The Risk Management Policy has been communicated to all units of BPP, including its subsidiaries and joint

| 2) Ms. Rodjanart Banyatananusard,   | CPA, License No. 8435; and/or |
| 3) Mr. Pongthavee Ratanakoses,      | CPA, License No. 7795; and/or |
| 4) Mr. Boonrueng Lerdwiseswit,      | CPA License No. 6552.         |

These CPAs of PricewaterhouseCoopers ABAS Ltd. (PwC) were appointed as the external auditors of BPP for 2025. The total audit fee for 2025 was approved at THB 1,990,000. One of the individuals on this list shall conduct an audit and express an opinion on BPP's financial statements on behalf of Pricewaterhouse Coopers ABAS Limited (PwC). In case these appointed auditors are unable to perform their duties, PricewaterhouseCoopers ABAS Limited (PwC) shall appoint other of its CPAs as the external auditors of BPP.

In summary, in 2024, the Audit Committee independently performed its duties and responsibilities set forth in the Audit Committee Charter based on their knowledge, capabilities, and prudent consideration for the equitable benefit of the stakeholders. The Audit Committee is certain that Banpu Power's financial statements were completed and were consistent with generally accepted accounting standards and principles, and there was adequate information disclosure. Banpu Power's business conduct was in line with a sound corporate governance policy, and the Company had an appropriate risk management system as well as effective and adequate internal control and internal audit systems. In addition, Banpu Power properly complied with existing laws and regulations relevant to its business operations.

On behalf of the Audit Committee

Mr. Yokporn Tantisawetrat Chairman of the Audit Committee Banpu Power Public Company Limited

# **Management's Discussion and Analysis**

#### 1. Management Discussion and Analysis

Banpu Power (the Company) continues to accelerate portfolio growth to become a leader in power generation and distribution across the Asia-Pacific region. As global energy demand rises rapidly, electricity consumption worldwide is projected to nearly double by 2050. The Company is wellpositioned to meet this growing demand, leveraging strong business presence in both USA and the Asia-Pacific region-markets with high electricity demand growth. A key factor driving this demand is the rapid expansion of data centers and artificial intelligence (AI) technology, presenting significant opportunities for the Company. To capitalize on these trends, the Company is committed to diversifying and optimizing portfolio beyond merely expanding power generation capacity, following the 'Beyond Quality Megawatts' approach. The Company aims to integrate energy-related businesses by growing power generation capacity from gas-fired power plants, while also venturing into other energy-related businesses, ensuring a balance between strong business growth and environmental responsibility.

On December 25, 2024, Banpu Power Investment Co., Ltd. ("BPIC"), a wholly owned subsidiary, completed the divestment of its equity interest in Nakoso IGCC Power Plant G.K. ("Nakoso") through its joint venture, Nakoso IGCC Management Co., Ltd. ("NIMCO"), in which BPIC holds a 33.5% stake. NIMCO divested its 40% equity interest in Nakoso, with the group's proportional share of the transaction value amounting to THB 1,151 million. This divestment resulted in a recognized impairment loss

#### Disclaimer

The Company makes no representation or warranty regarding the opinions, forecasts, or statements of any partners, or other third parties. Any financial outlooks or forward-looking statements, including but not limited to metrics such as EBITDA and net profit, that may be issued or released by partners, or other third parties, are solely their own and do not reflect the views of The Company. The Company assumes no responsibility for their accuracy, credibility, or future realization of any such statements. Additionally, such disclosures are considered market practices in the countries where the Company operates. The Company does not monitor, verify, or control third-party opinions or statements and does not endorse or assume liability for their content or use. The Company acknowledges the potential risks arising from external factors, such as fluctuations in foreign exchange rates, interest rates, and environmental regulations in the countries where it operates, which may impact its financial performance and outlook. Under no circumstances shall The Company be liable for any direct, indirect, incidental, consequential, or special damages arising from reliance on or use of such information.

of THB 1,621 million. The divestment aligns with the Company's portfolio management strategy, aiming to transition towards low-carbon energy generation while maintaining strong cash flow generation. The proceeds from the transaction will be strategically allocated to support new investment opportunities and drive the Company long-term growth.

In 2024, the Company reported a net profit of THB 1,746 million, which includes the loss from the divestment of the Nakoso mentioned above. In comparison, in 2023, the Company recorded a THB 1,336 million gain from the revaluation of investment in battery business. Excluding these special items, net profit declined by THB 616 million, or 15% compared to the previous year. EBITDA<sup>1</sup> from normal operation was THB 7,383 million, declined by THB 3,543 million or 32% compared to the previous year. The weaker performance was primarily attributed to a decline in earnings from gas-fired power plants in USA, which were affected by unfavorable weather conditions. Milder-than-expected temperatures during both summer and winter resulted in lower electricity prices and reduced electricity demand. Meanwhile, the HPC and BLCP power plants maintained high Equivalent Availability Factor (EAF) levels at 80% and 90%, respectively, supported by efficient operations, and operated an outside of contracted availability hours (CAH) as they fulfilled electricity dispatch ahead of schedule according to contracted hours. However, profit contributions declined mainly due to unrealized foreign exchange losses.

Nevertheless, the Company achieved improved performance in the CHP power plants and the SLG power plant in China, benefiting from lower coal costs and additional revenue from selling Carbon Emission Allowances (CEAs), reflecting operational efficiency. Additionally, profit contributions from the Nakoso power plant improved compared to the previous year when the plant recorded losses due to maintenance shutdown. The renewable energy and energy technology businesses also performed better, excluding the gain from the battery business revaluation in 2023. Notably, the Company recorded a net gain from changes in fair value of financial instruments, used to hedge risks associated with gas-fired power plants in USA, as the hedging contract prices exceeded both future and realized electricity prices.

As a sustainable energy generation company, the Company remains committed to operating under ESG principles, focusing on reducing environmental impact, social and community development, and ensuring fair, transparent, and accountable corporate governance. The company continues to enhance operational efficiency with a skilled team, while delivering consistent returns to shareholders, and creating sustainable value for all stakeholders.

#### 2. Group Performance Analysis

The analysis and explanation performance for the year ended 31 December 2024 and 2023 were described as follows:

Consolidated Statement of Income for the year ended 31 December 2024 and 2023:

| Consolidated financial performance                                     | Y2024    | Y2023    | Chai    | nge   |
|--|----------|----------|---------|-------|
| (Unit: Million Baht)   |          |          | Amount  | %     |
| Sales  | 25,827   | 28,380   | (2,553) | -9%   |
| Cost of sales  | (23,811) | (20,122) | (3,689) | -18%  |
| Gross profit   | 2,016    | 8,258    | (6,242) | -76%  |
| Selling & Administrative expenses                                      | (1,945)  | (2,254)  | 309     | 14%   |
| Share of profit from an associate and joint ventures                   | 3,866    | 5,009    | (1,143) | -23%  |
| Impairment on Investment - joint ventures                              | (1,621)  | -        | (1,621) | 100%  |
| Net gains (losses) from changes in fair value of financial instruments | 2,045    | (2,791)  | 4,836   | 173%  |
| Net losses on exchange rate  | (95)     | (36)     | (59)    | -164% |
| Other Income   | 796      | 708      | 88      | 12%   |
| Financial costs  | (3,019)  | (2,054)  | (965)   | -47%  |
| Profit before income taxes   | 2,043    | 6,840    | (4,797) | -70%  |
| Income taxes   | (332)    | (402)    | 70      | 18%   |
| Profit for the year  | 1,711    | 6,438    | (4,727) | -73%  |
| Owners of the company  | 1,746    | 5,319    | (3,573) | -67%  |
| Non-controlling interests  | (35)     | 1,119    | (1,154) | -103% |
| Basic earnings per share (unit : Baht)                                 | 0.573    | 1.745    | (1.172) | -67%  |

The group reported 2024 net profit of THB 1,746 million, which included non-recurring item, a provision for impairment loss on investment in NIMCO resulting from disposal of shareholdings in Nakoso power plant in Japan of THB 1,621 million. Whereas in 2023 the group reported a net profit at 5,319 which includes gains on fair value remeasurement from a battery business of an associate of THB 1,336 million. Excluding the previously mentioned, the group's net profit would decrease by THB 616 million or 15%, resulting from a decrease in operating performance from gas-fired power plants in USA impacted by adverse weather conditions, affecting demand and electricity price, including a higher of financial cost to support business expansion. The decrease in group's net profit includes a decrease in profit sharing from HPC and BLCP from unrealized loss on exchange rate. However, the group recognized gains on financial derivatives, which increased by THB 2,418 million according to the holding interest. Additionally, the operating performance from CHP plants and SLG power plant was better, benefiting from lower coal costs compared to the previous year, and recognized income from sales of carbon emission allowance right of power plant.

Since 2Q2024 the group has changed an accounting policy for the presentation of realized gains (losses) on derivatives from forecasted transactions that are hedged (hedged items), which previously chosen to present separately from hedged items, are now included with corresponding hedged items. This change was detailed in a note to financial statements no.9, Segment Information.

The group is within under the scope of the Pillar Two<sup>2</sup> model rules, however, the Pillar Two legislation will come into effect on 1 January 2025. Since the Pillar Two legislation was not effective at the reporting date, there is no related current tax exposure as details shown in notes no. 17 of the financial statements. The group is assessing the exposure to the Pillar Two legislation for when it comes into effect. The Group is currently engaged with tax specialists to prepare and assess the impact in applying the Pillar Two model rules.

Details of the group operating performance for 2024 were described as follows:

#### Sales, Cost of sales and Gross profit

Sales reported at THB 25,827 million, decreased by THB 2,553 million or 9% compared to 2023, resulting from a decrease in power sales from a gas-fired power plant in USA of THB 2,218 million and power and steam sales from CHP plants in China of THB 335 million. Details were described as follows:

| Items                 | Power<br>(GW |          | Stea<br>Others<br>(Million | Sold  | Aver<br>Power<br>(RMB/ | tariff | Average<br>others<br>(RMB/1 | price  |

| Gas-Fired Power Plant | 7,360.24     | 5,415.74 | -                          | -     | 39.79                  | 76.73  | -                           | -      |

**Note** <sup>2</sup>The Pillar Two rules were announced in December 2021 by the Organization for Economic Co-operation and Development (OECD) to reform international corporate taxation. The aim is for large multinational groups to pay an effective income tax rate of at least 15% in each country where they operate. These groups are required to pay additional tax (Top-up tax) under the Pillar Two rules for the difference between the effective tax rate under the Pillar Two (GloBE) rules in the countries where they operate and the minimum rate of 15%. In 2024, Thailand, where the group operates, enacted the Pillar Two legislation, but it will be effective from January 1, 2025

| Gas-Fired Power Plant<br>in USA: decrease<br>THB 2,218 million                      | Sales from gas-fired power plant business reported lower, derived from a decrease in sales price by \$36.94 per MWh. Average sales price in 2024 was \$39.79 (2023 : \$76.73), impacted by both adverse weather and mild temperatures than usual, led to a decrease in electricity price and electricity demand. Whereas sales volume increased by 1,944.50 GWh due to the acquisition of Temple II gas-fired power plant since 3Q2023.  |
|---|--|
| Combined Heat and<br>Power (CHP) plants in<br>China:<br>decrease<br>THB 335 million | <ul> <li>decrease in sales from CHP plants compared to 2023 was derived from:</li> <li>1. A decrease of THB 112 million in power sales. This was a result of a decrease in electricity demand, partly due to weather conditions, and a decrease in industrial customers from Zouping CHP plants, which resulted in a decrease in sales volume of 57.39 GWh.</li> <li>2. A decrease of THB 187 million from steam sales and others. This was a result of a decrease in selling price of RMB 4.78 per kWh. Average selling price per kWh in 2024 was RMB 136.83 (2023 : RMB 141.61), while the sales volume was similar to the previous year.</li> </ul> |
|   | 3. The effects of foreign exchange rate translation of THB 36 million. This was due to an appreciation of THB currency against RMB currency compared to 2023, resulting in a decrease in revenue in THB currency when converting from RMB currency to THB currency. Average exchange rate of RMB/THB in 2024 was THB 4.9029 (2023 : THB 4.9165).   |
| Cost of sales: Increase<br>18%  | Cost of sales reported at THB 23,811 million, increased by THB 3,689 million compared to 2023 was derived from:  |
|   | <ol> <li>Gas-fired power plants in USA that cost of sales increased by THB 4,528<br/>million. This was from an increase in the use of natural gas of 13.65 billion<br/>cubic feet due to higher electricity sales volume and the effects from a<br/>depreciation of THB currency against USD currency resulting in higher<br/>cost of sales in THB currency when converting from USD currency.<br/>Average exchange rate of USD/THB in 2024 was THB 35.2935 (2023 :<br/>THB 34.8022).</li> </ol>   |
|   | 2. CHP plants in China that cost of sales decreased by THB 839 million because of:   |
|   | <ul> <li>A decrease in coal cost THB 790 million from a decrease in average<br/>coal cost per tonne by RMB 140. Average coal cost per tonne in 2024<br/>was RMB 895 (2023 : RMB 1,035).</li> </ul>   |
|   | <ul> <li>The effects from an appreciation of THB currency against RMB<br/>currency of THB 49 million, resulting in a decrease in cost of sales in<br/>THB currency when converting from RMB currency. Average exchange<br/>rate of RMB/THB in 2024 was THB 4.9029 (2023 : THB 4.9165).</li> </ul>  |
| Gross profit: Decrease<br>76%   | Gross profit reported at THB 2,016 million, decreased by THB 6,242 million compared to 2023 derived from:  |
|   | <ol> <li>A decrease in operating performance from gas-fired power plants in<br/>USA of THB 6,747 million. This was from a decrease in selling price per<br/>MWh, and an increase in cost from gas production resulting from<br/>the acquisition of Temple II gas-fired power plant since 3Q2023.</li> </ol>  |
|   | <ol> <li>An increase in operating performance from CHP plants in China of THB<br/>505 million from a decrease in coal cost compared to 2023.</li> </ol>  |
| Selling and<br>Administrative<br>expenses: Decrease 14%                             | Administrative expenses of THB 1,945 million decreased by THB 309 million compared to 2023, was mainly from consulting fees for business expansion in the USA incurred last year.  |

Share of profit from Recognition of profit sharing from joint ventures and an associate decreased by

1. A decrease in profit sharing recognition from investment in renewable power and energy technology business of THB 1,298 million, mainly from in 2023 there was a recognition of gain on fair value remeasurement of a battery business of THB 1,336 million. Excluding this item, the share of profit recognition was increased by THB 38 million. Furthermore, there was a loss on exchange rate translation from USD loan to an associate resulting from an appreciation of USD currency against THB currency at the end of year.

2. A decrease in profit sharing recognition from BLCP of THB 48 million. This was primary from an increase in deferred tax expense recognition and offset with gain on foreign exchange rate translation total of THB 30 million, and a decrease in

3. A decrease in profit sharing recognition from HPC power plant and PFMC mine of THB 20 million was a resulting from a recognition of loss on exchange rate translation of THB 46 million, while an increase in operating performance of THB

4. An increase in profit sharing recognition from SLG power plant of THB 29 million was from better operating performance from an increase in steam sales volume and from entering coal purchase contract at favorable price that led to a significantly

5. An increase in profit sharing recognition from Nakoso power plant in Japan of THB 194 million from resuming commercial operation in March 2024 after a maintenance shutdown in 2023 to enhance its efficiency and long-term stability.

> joint venture amounting to THB 1,621 million was a areholdings in Nakoso power plant in Japan to align ortfolio management in transition to a low-carbon

> of THB 2,045 million that was a net result of unrealized financial derivatives of THB 1,297 million and realized THB 748 million resulting from higher contract price rrent price respectively.

# 4. Statements of Consolidated Cash Flows

Statement of consolidated cash flows for the year ended 31 December 2024 reported a decrease of net cash flows from 31 December 2023 total THB 1,761 million (included loss on exchange rate translation of THB 68 million). Details were as follows:

| Cash flow (Unit : Million Baht)                    | Amount  |
|--|---------|
| Net cash used in operating activities              | (413)   |
| Net cash used in investing activities              | (179)   |
| Net cash used in financing activities              | (1,101) |
| Net decrease in cash and cash equivalents          | (1,693) |
| Exchange differences on cash and cash equivalents  | (68)    |
| Cash and cash equivalents at beginning of the year | 9,352   |
| Cash and cash equivalents at end of the year       | 7,591   |

4.1 Net cash outflows from operating activities of THB 413 million comprised of:

- Collection from sales of power and steam THB 7,810 million.
- Payments to suppliers and contractors THB 4,972 million.
- Payments of interest expense THB 3,041 million.
- Payments of corporate income tax THB 210 million.
- 4.2 Net cash outflows from investing activities of THB 179 million comprised of:
  - Receipts of dividends from joint ventures THB 2.603 million.
  - Receipts from interest income THB 201 million.
  - Receipts from investment in debt instruments THB 3,031 million.
  - Receipts from loan to related party THB 265 million.
  - Receipts from a reduction of investment in a joint venture of THB 200 million.
  - Payments for additions of property plant and equipment and project under development THB 445 million.
  - Payments for loan to related party THB 3,058 million.
  - Payments for investment in debt instruments THB 2,976 million.

4.3 Net cash outflows from financing activities of THB 1,101 million comprised of:

- Receipts from short-term and long- term loans from financial institutions THB 8,213 million.
- Repayments of short-term and long-term loans from financial institutions THB 7,170 million.
- Payment for lease liabilities of THB 11 million.
- Dividend paid to shareholders THB 2,133 million.

# **Independent Auditor's Report**

# To the shareholders of Banpu Power Public Company Limited

# **My opinion**

In my opinion, the consolidated financial statements and the separate financial statements present fairly, in all material respects, the consolidated financial position of Banpu Power Public Company Limited (the Company) and its subsidiaries (the Group) and the separate financial position of the Company as at 31 December 2024, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRS).

## What I have audited

The consolidated financial statements and the separate financial statements comprise:

- the consolidated and separate statements of financial position as at 31 December 2024;
- the consolidated and separate statements of comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the consolidated and separate financial statements, which include material accounting policies and other explanatory information.

#### **Basis for opinion**

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (TFAC Code) that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with the TFAC Code. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

#### **Key audit matters**

Key audit matters are those matters that, in my professional judgement, were of most significance in my audit of the consolidated and separate financial statements of the current period. I determine one key audit matter: Impairment assessment of investment in a subsidiary and a joint venture. The matter was addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on the matter.

# **Key audit matter**

### How my audit addressed the key audit matter

#### Impairment assessment of investment in a subsidiary and a joint venture

Refer to Note 15 Investments in subsidiaries, an associate and joint ventures. The Company has an investment in Banpu Power International Limited (BPPI), a subsidiary engaged in investing in the power generation business. BPPI has an investment in Nakoso IGCC Management Co., Ltd. (NIMCO), a joint venture investing in the power generation business in Japan, with its investment solely in Nakoso IGCC Power Plant G.K. (Nakoso).

On 25 December 2024, NIMCO completed the disposal of its entire shareholding in Nakoso with a selling price equivalent to Baht 1,151 million. This resulted in NIMCO recognising a loss from the disposal of Nakoso in its financial statements, and NIMCO has ceased operations. Management considered this transaction as an indication that the investments in BPPI and NIMCO might be impaired, as BPPI preliminary has remaining investments in coal-fired power plants in China. Therefore, management tested for impairment of these investments and calculated the recoverable amount using a value-in-use approach. Establishing the recoverable amount involves significant management judgments in determining assumptions for future operating results of the business, projected cash flows and the discount rate applied to these projected cash flows. The key assumptions applied in establishing the recoverable amount of investment in a subsidiary include estimated electricity and stream tariff, estimated electricity and stream sales volume, operating expenses and capital expenditures.

The result of management's test indicated that the recoverable amount of the investment in a subsidiary and a joint venture was lower than their carrying amount. Therefore, the Company recognised an impairment loss for the investment in a subsidiary in the separate statement of comprehensive income for the year 2024 amounting to Baht 2,960 million and the Group recognised an impairment loss for the investment in a joint venture in the consolidated statement of comprehensive evidence. income for the year 2024 amounting to Baht 1,621 million.

I focused on the impairment assessment of the investment in a subsidiary and a joint venture due to their significant values and because establishing the recoverable amount involves numerous assumptions. Moreover, the determination of these assumptions involves significant management judgments in assessing the appropriateness of the impairment test.

I planned and carried out the following procedures to assess the impairment testing of the investment in a subsidiary and a joint venture which prepared by management.

- assessed the appropriateness of management's identification of the indicators for impairment of investment in a subsidiary and a joint venture.
- inquired with management to understand and recalculate an impairment loss on investment in a subsidiary and a joint venture.
- tested the reasonableness of the discount rate by considering and comparing it with data from companies in the same industry, which can be referenced from publicly available information to assess whether the discount rate used by management is within the acceptable range.

In addition, I designed and communicated the following procedures to the component auditor in China and evaluated the work of the component auditor.

- inquired with management to understand the assumptions applied in the cash flow projections.
- evaluated management's key assumptions applied in the impairment testing of the investment in a subsidiary, particularly information related to estimated electricity and stream tariff, estimated electricity and stream sales volume, operating expenses and capital expenditures. The procedures included comparing them with the underlying agreements, external sources, and the approved business plan.

assessed the reasonableness of the business plan by comparing them with the actual results of the year 2024

Based on the results of the aforementioned procedures, I found that the key assumptions applied by management in assessing the recoverable amount are reasonable and consistent with the supporting

#### Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report, if I conclude that there is a material misstatement therein. I am required to communicate the matter to the audit committee.

# Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRS, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group's and the Company's financial reporting process.

# Auditor's responsibilities for the audit of the consolidated and separate financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

of internal control.

· Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- · Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction, supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the audit committee with a statement that I have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, I determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not be communicated in my report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

# **Banpu Power Public Company Limited**

Notes to the consolidated and separate financial statements For the year ended 31 December 2024

#### **1** General information

Banpu Power Public Company Limited (the Company) is a public company which is listed on the Stock Exchange of Thailand. The Company is incorporated and domiciled in Thailand. The address of the Company's registered office is 1550, Thanapoom Tower 26th Floor, New Petchburi Road, Makkasan, Ratchathewi, Bangkok.

For reporting purpose, the Company and its subsidiaries are referred to as the Group.

The Company is a subsidiary of Banpu Public Company Limited (the Parent) which holds 78.66% of the Company's shares.

The Group is engaged in investments in power businesses in Thailand and overseas.

These consolidated and separate financial statements were authorised by the Board of Directors on 26 February 2025.

#### **Basis of preparation** 2

The consolidated and separate financial statements have been prepared in accordance with Thai Financial Reporting Standards (TFRS) and the financial reporting requirements issued under the Securities and Exchange Act.

The consolidated and separate financial statements have been prepared under the historical cost convention except for certain accounts as disclosed in the accounting policies.

The preparation of financial statements in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 8.

An English version of the consolidated and separate financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

#### Amended financial reporting standards 3

- the Group has disclosed the impact of adopting of this standard in Note 17.
- 3.2 Amended financial reporting standards that are effective for the accounting period beginning on or after 1 January 2025.
  - a waiver or a breach of covenant).

Covenants of loan arrangements will not affect classification of a liability as current or non-current at the end of reporting period if the entity must only comply with the covenants after the reporting period. However, if the entity must comply with a covenant either before or at the end of reporting period, this will affect the classification as current or non-current even if the covenant is only tested for compliance after the reporting period.

The amendments require disclosures if an entity classifies a liability as non-current and that liability is subject to covenants with which the entity must comply within 12 months of the reporting period. The disclosures include:

- the carrying amount of the liability;
- information about the covenants; and
- covenants

The amendments also clarify what TAS 1 means when it refers to the 'settlement' of a liability. Terms of a liability that could, at the option of the counterparty, result in its settlement by the transfer of the entity's own equity instrument can only be ignored for the purpose of classifying the liability as current or non-current if the entity classifies the option as an equity instrument.

The amendments must be applied retrospectively in accordance with the normal requirements in TAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.

3.1 Commencing 1 January 2024, the Group has adopted amended financial reporting standards that are effective for accounting period beginning or after 1 January 2024 and relevant to the Group. For the amendments to TAS 12 - Income Taxes, related to the Pillar Two model rules,

a) Amendments to TAS 1 Presentation of Financial Statements clarified that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the entity's expectations or events after the reporting period (for example, the receipt of

facts and circumstances, if any, that indicate that the entity might have difficulty complying with the

b) Amendments to TFRS 16 Leases added to the requirements for sale and leaseback transactions which explain how an entity accounts for a sale and leaseback after the date of the transaction.

The amendments specify that, in measuring the lease liability subsequent to the sale and leaseback, the seller-lessee determines 'lease payments' and 'revised lease payments' in a way that does not result in the seller-lessee recognising any amount of the gain or loss that relates to the right of use that it retains. This could particularly impact sale and leaseback transactions where the lease payments include variable payments that do not depend on an index or a rate.

c) Amendments to TAS 7 Statement of cash flows and TFRS 7 Financial instruments: Disclosures require specific disclosures about supplier finance arrangements (SFAs). The amendments respond to investors that said that they urgently needed more information about SFAs to be able to assess how these arrangements affect an entity's liabilities, cash flows and liquidity risk.

To meet investors' needs, the new disclosures will provide information about:

- (1) The terms and conditions of SFAs.
- (2) The carrying amount of financial liabilities that are part of SFAs, and the line items in which those liabilities are presented.
- (3) The carrying amount of the financial liabilities in (2), for which the suppliers have already received payment from the finance providers.
- (4) The range of payment due dates for both the financial liabilities that are part of SFAs, and comparable trade payables that are not part of such arrangements.
- (5) Non-cash changes in the carrying amounts of financial liabilities in (2).
- (6) Access to SFA facilities and concentration of liquidity risk with the finance providers.

The Group has not yet adopted these standards. The Group's management is currently assessing the impact of adoption of these standards.

#### 4 Changes in accounting policy

The Group has reclassified the presentation of realised gains (losses) on derivatives for the forecasted transactions that are hedged. Previously, the Group chose to separately present the realised gains (losses) on derivatives from those forecasted transactions that are hedged, including them in the forecasted transactions that are hedged. This change was made to align with the Group's financial risk management policy and industry practices.

The Group has reclassified comparative figures of the consolidated statement of comprehensive income to conform with the current period presentation of the Group as described below.

For the year ended 31 December 2023

Sales Cost of sales Net losses from changes in fair value of financial instruments

#### 5 Accounting policies

The material accounting policies adopted in the preparation of these consolidated and separate financial statements are set out below.

#### 5.1 Principles of consolidation

#### a) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group until the date that control ceases.

In the separate financial statements, investments in subsidiaries are accounted for using cost method less accumulated impairment (if any).

#### b) Associates

Associates are all entities over which the Group has significant influence but not control or joint control. Investments in associates are accounted for using the equity method of accounting.

In the separate financial statements, investment accumulated impairment (if any).

| Consolidated financial statements |                   |              |  |  |
|-----------------------------------|-------------------|--------------|--|--|
|                                   |                   | Baht'000     |  |  |
| Previously<br>report              | Reclassifications | Reclassified |  |  |
|                                   |                   |              |  |  |
| 30,443,044                        | (2,063,422)       | 28,379,622   |  |  |
| (19,885,667)                      | (236,075)         | (20,121,742) |  |  |
| (5,090,974)                       | 2,299,497         | (2,791,477)  |  |  |

In the separate financial statements, investments in associates are accounted for using cost method less

#### c) Joint arrangements

Investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangements.

#### Joint operations

A joint operation is a joint arrangement whereby the Group has rights to the assets, and obligations for the liabilities relating to the arrangement. The Group recognises its direct right to the assets, liabilities, revenues and expenses of joint operations and its share of any jointly held or incurred assets, liabilities, revenues and expenses. These have been incorporated in the Group's financial statement line items.

#### Joint ventures

A joint venture is a joint arrangement whereby the Group has rights to the net assets of the arrangement. Interests in joint ventures are accounted for using the equity method.

In the separate financial statements, investments in joint ventures are accounted for using equity method.

#### d) Equity method

The investment is initially recognised at cost which is consideration paid and directly attributable costs.

The Group's subsequently recognises shares of its associates and joint ventures' profits or losses and other comprehensive income in the profit or loss and other comprehensive income, respectively. The subsequent cumulative movements are adjusted against the carrying amount of the investment.

When the Group's share of losses in associates and joint ventures equals or exceeds its interest in the associates and joint ventures together with any long-term interests, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associates and joint ventures.

#### e) Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A difference between the amount of the adjustment to non-controlling interests to reflect their relative interest in the subsidiary and any consideration paid or received is recognised within equity.

If the ownership interest in associates and joint ventures is reduced but significant influence and joint control is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss or retained earnings where appropriate. Profit or loss from reduce of the ownership interest in associates and joint ventures is recognise in profit or loss.

When the Group losses control, joint control or significant influence over investments, any retained interest in the investment is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value becomes the initial carrying amount of the retained interest which is reclassified to investment in an associate, or a joint venture or a financial asset accordingly.

#### f) Intercompany transactions on consolidation

Intra-group transactions, balances and unrealised gains on transactions are eliminated. Unrealised gains on transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interest in the associates and joint ventures. Unrealised losses are also eliminated in the same manner unless the transaction provides evidence of an impairment of the asset transferred.

#### 5.2 Business combination

The Group applies the acquisition method to account for business combinations with an exception on business combination under common control. The consideration transferred for the acquisition of a subsidiary comprises fair value of the assets transferred, liabilities incurred to the former owners of the acquiree and equity interests issued by the Group.

Identifiable assets and liabilities acquired and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

On an acquisition-by-acquisition basis, the Group initially recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the consideration transferred, the amount of any non-controlling interest recognised and the acquisitiondate fair value of any previous equity interest in the acquiree (for business combination achieved in stages) over the fair value of the identifiable net assets acquired is recorded as goodwill. In the case of a bargain purchase, the difference is recognised directly in profit or loss.

#### Acquisition-related cost

Acquisition-related cost are recognised as expenses in consolidated financial statements.

#### Step-up acquisition

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measured are recognised in profit or loss.

Changes in fair value of contingent consideration paid/received

Subsequent changes to the fair value of the contingent consideration that is an asset or liability is recognised in profit or loss. Contingent consideration that is classified as equity is not re-measured.

#### Business combination under common control

The Group accounts for business combination under common control by measuring acquired assets and liabilities of the acquiree at their carrying values presented in the highest level of the consolidation. The Group retrospectively adjusted the business combination under common control transactions as if the combination had occurred on the later of the beginning of the preceding comparative period and the date the acquiree has become under common control.

Consideration of business combination under common control are the aggregated amount of fair value of assets transferred, liabilities incurred and equity instruments issued by the acquirer at the date of which the exchange in control occurs.

The difference between consideration under business combination under common control and the acquirer's interests in the carrying value of the acquiree is presented as "surplus arising from business combination under common control" in equity and is derecognised when the investment is disposed of by transferred to retained earnings.

#### 5.3 Foreign currency translation

#### Functional and presentation currency a)

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which each entity operates (the Functional Currency). The financial statements are presented in Baht, which is the Company's functional currency and presentation currency.

#### b) Transactions and balances

at the dates of the transaction.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

Any exchange component of gains and losses on a non-monetary item that recognised in profit or loss, or other comprehensive income is recognised following the recognition of a gain or loss on the non-monetary item.

#### c) Group companies

The results and financial position of all the Group's entities (none of which has the currency of a hyperinflationary economy) that have a different functional currency from the Group's presentation currency are translated into the presentation currency as follows:

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing rate.

#### 5.4 Trade receivables and note receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are classified as current.

Trade receivables are recognised initially at the amount of consideration that is unconditionally unless they contain significant financing components, they are recognised at its present value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

Notes receivable are notes received from customers that are issued by a private company from sales of electricity and steam from subsidiaries in the People's Republic of China in the ordinary course of business. If collection is expected in one year or less, they are classified as current assets. If not, they are presented as non-current assets.

The impairment of trade receivables and note receivables is disclosed in Note 5.6 c).

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing

- assets and liabilities are translated at the closing rate at the date of respective statement of financial position; - income and expenses for statement of comprehensive income are translated at average exchange rates; and - all resulting exchange differences are recognised in other comprehensive income.

#### 5.5 Fuel and spare parts

Fuel consists of coal, diesel and natural gas and are valued at the lower of cost or net realisable value. Spare parts which are not met conditions of property, plant and equipment are stated at cost less allowance for obsolescence and defective.

Cost of fuel and spare parts are determined by the weighted average method. The cost of purchase comprises both the purchase price and costs directly attributable to the acquisition, such as import duties and transportation charges, less all attributable discounts and allowances. Net realisable value is the estimate of the selling price in the ordinary course of business, less the costs of completion. The Group recognises allowance for obsolete, slow-moving and defective spare parts are reviewed on a specific case.

#### 5.6 Financial assets

#### Recognition and derecognition a)

Regular way purchases, acquires and sales of financial assets are recognised on trade-date. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

#### b) Classification and measurement

#### Debt instruments

The Group classifies its debt instrument financial assets depending on i) business model for managing the asset and ii) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest (SPPI).

There are three measurement categories into which the Group classifies its debt instruments:

- separately in the statement of comprehensive income.
- statement of comprehensive income.
- financial instruments in the period in which it arises.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

#### Equity instruments

Except for equity instruments held for trading, which are measured at FVPL, the Group makes an irrevocable election at the time of initial recognition, classifying its equity instruments into two measurement categories.

- separately from other changes in fair value.

Dividends from such investments (FVPL/FVOCI) continue to be recognised in profit or loss as dividend income when the right to receive payments is established.

- Amortised cost: Financial assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss. Impairment expenses are presented

Fair value through other comprehensive income (FVOCI): Financial assets that are held for i) collection of contractual cash flows; and ii) for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income (OCI), except for 1) the recognition of impairment losses/reversal of impairment, 2) interest income using the effective interest method, and 3) foreign exchange gains and losses which are recognised in profit or loss. When the financial assets is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains (losses). Interest income is included in interest income. Foreign exchange gains and losses are presented in net gains (losses) on exchange rate. Impairment expenses are presented separately in the

Fair value through profit or loss (FVPL): Financial assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within net gains (losses) from changes in fair value of

- FVPL: the equity instruments are measured at fair value and changes in the fair value are recognised in net gains (losses) from changes in fair value of financial instruments in the statement of comprehensive income.

- FVOCI: the equity instruments are measured at fair value and changes in the fair value are recognised in OCI. There is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Impairment losses (and reversal of impairment losses) are not reported

Impairment c)

> The Group applies the TFRS 9 simplified approach in measuring the impairment of trade receivables and other receivables, which applies lifetime expected credit loss, from initial recognition, for trade receivables and other receivables.

> To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

> For other financial assets carried at amortised cost and FVOCI, the Group applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

> The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing i) expected risk of default as of the reporting date and ii) estimated risk of default on the date of initial recognition.

> The Group assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probability-weighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Group and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Group reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money; and -
- supportable and reasonable information as of the reporting date about past experience, current conditions, and forecasts of future situations.

Impairment (and reversal of impairment) losses are recognised in profit or loss as a separate line item.

#### 5.7 Property, plant and equipment

Property, plant and equipment are initially recorded at cost including contingent consideration arrangement. Subsequently, all plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Subsequent changes in contingent consideration shall be recognised as part of its cost.

Subsequent costs are included in the asset's carrying amount, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

The Group will recognise other repairs and maintenance to profit or loss when incurred.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost net of their residual values over their estimated useful lives as follows:

Building and building improvements Power plants and components of power plants and machinery and equipment Furniture and tools Office equipment

Motor vehicles

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each financial year-end.

Gains or losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in the profit or loss.

#### 5.8 Goodwill

Goodwill is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired. It is carried at cost less accumulated impairment losses.

For the purpose of impairment testing, goodwill is allocated to cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes.

5 to 30 years 10 to 30 years 3 to 5 years 3 to 5 years 5 years

#### 5.9 Intangible assets

#### Computer software

Computer software development costs recognised as assets are amortised over their estimated useful lives, which do not exceed 5 years.

#### b) Rights to operate the power plants

The rights to operate the power plants arising from purchase of investments are amortised over the periods of estimated useful life of the power plants.

#### 5.10 Impairment of assets

Assets that have an indefinite useful life are tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired. Assets that are subject to amortisation are reviewed for impairment whenever there is an indication of impairment. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. Where the reasons for previously recognised impairments no longer exist, the impairment losses on the assets concerned other than goodwill is reversed.

#### 5.11 Financial liabilities

#### Classification a)

Financial instruments issued by the Group are classified as either financial liabilities or equity securities by considering contractual obligations.

#### b) Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

#### Derecognition and modification c)

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated/modified, the Group assesses whether the renegotiation/ modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains (losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated/modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains (losses) in profit or loss.

#### 5.12 Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity.

#### Current tax

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

#### Deferred income tax

Deferred income tax is recognised on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not recognised for temporary differences arise from:

- foreseeable future.

Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. investments in subsidiaries, associates and joint arrangements where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

#### 5.13 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated.

#### 5.14 Revenue recognition

Revenue is recorded net of value added tax. They are recognised in accordance with the provision of goods or services, provided that collectability of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfilment of the obligation to the customer. Revenue is recognised as follows.

Sales of electricity and steam not under lease agreements

The Group recognises revenue from sales of electricity and steam relating to Power Purchase Agreement and Steam Purchase Agreement at certain points in time when the control of products is transferred to the customer at the delivery point. Revenue represents the revenue earned from the sale of Group's products with realisable value net of valueadded tax, rebate, and discounts.

Sales of electricity under finance lease agreements

Finance lease income under power purchase agreements is recognised on an effective interest method over the period of the agreements.

Service income under finance lease agreements related to the Power Purchase Agreements is recognised when the services have been rendered. Service income comprises income in relation to the availabilities of the power plants, other servicing income and fuel cost received from leases with respect to the leased assets. If the considerations exceed the services rendered, a contract liability is recognised. On the other hand, if the considerations less than the services rendered, a contract asset is recognised.

Dividend income

Dividend income is recognised when the Group's right to receive payment is established.

Interest income

Interest income is recognised using the effective interest method.

#### 5.15 Dividend distribution

Dividends distribution to the Group's shareholders is recognised as a liability in the consolidated and separate financial statements in the period in which the dividends are approved by the shareholders and interim dividends are approved by the Board of Directors of the Company.

#### 5.16 Derivatives and hedging activities

Embedded derivative and derivatives that do not qualify for hedge accounting a)

Embedded derivative that is separately accounted for and derivatives that do not qualify for hedge accounting is initially recognised at fair value. Changes in the fair value are included in "net gains (losses) from changes in fair value of financial instruments.

Fair value of derivatives is classified as a current or non-current following its remaining maturity.

#### Hedge accounting b)

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The Group designates certain derivatives as either:

- hedges of the fair value of i) recognised assets or liabilities or ii) unrecognised firm commitments (fair value hedges)
- hedges of a particular risk associated with the cash flows of i) recognised assets and liabilities and ii) highly probable forecast transactions (cash flow hedges); or
- hedges of a net investment in a foreign operation (net investment hedges).

At inception of the hedge relationship, the Group documents i) the economic relationship between hedging instruments and hedged items including whether changes in the cash flows of the hedging instruments are expected to offset changes in the cash flows of hedged items and ii) its risk management objective and strategy for undertaking its hedge transactions.

The full fair value of a hedging derivative is classified as a current or non-current asset or liability following the maturity of related hedged item.

#### Hedge effectiveness

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument.

For hedges of foreign currency, the Group enters hedge relationships where the critical terms of the hedging instrument match with the terms of the hedged item. The Group therefore performs a qualitative assessment of effectiveness.If changes in circumstances affect the terms of the hedged item such that the critical terms no longer match exactly with the critical terms of the hedging instrument, the Group uses the hypothetical derivative method to assess effectiveness.

In hedges of foreign currency, ineffectiveness may arise if the timing of the forecast transaction changes from what was originally estimated, or if there are changes in the credit risk of the derivative counterparty.

The Group enters interest rate swaps that have similar critical terms as the hedged item, such as reference rate, reset dates, payment dates, maturities, and notional amount. The Group does not hedge all of its loans; therefore, the hedged item is identified as a proportion of the outstanding loans up to the notional amount of the swaps. As all critical terms matched during the year, there is an economic relationship.

Hedge ineffectiveness for interest rate swaps is assessed using the same principles as for hedges of foreign currency purchases. It may occur due to the credit value/debit value adjustment on the interest rate swaps which is not matched by the loan, and differences in critical terms between the interest rate swaps and loans.

Cash flow hedges that qualify for hedge accounting

The effective portion of changes in the fair value of derivatives that are designated and qualified as cash flow hedges is recognised in the cash flow hedge reserve within equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss.

When derivatives such as foreign exchange forward contracts, currency and interest rate swaps contracts are used to hedge forecast transactions, the Group generally designates only the change in fair value of the forward contract related to the spot component as the hedging instrument. Gains or losses relating to the effective portion of the change in the spot component of the forward contracts are recognised in the cash flow hedge reserve in other comprehensive income within equity. The change in the forward element of the contract that relates to the hedged item ('aligned forward element') is recognised within other comprehensive income in the costs of hedging reserve within equity.

In some cases, the Group may designate the full change in fair value of the forward contract (including forward points) as the hedging instrument. In such cases, the gains or losses relating to the effective portion of the change in fair value of the entire forward contract are recognised in the cash flow hedge reserve within equity.

Amounts accumulated in equity are reclassified in the periods when the hedged item affects profit or loss.

When a hedging instrument expires, or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative deferred gain or loss and deferred costs of hedging in equity at that time remains in equity until the forecasted transaction occurs. When the forecasted transaction is no longer expected to occur, the cumulative gain or loss and deferred costs of hedging that were reported in equity are immediately reclassified to profit or loss.

Net investment hedges

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges.

Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated in reserves in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss within net gains (losses) from changes in fair value of financial instruments. Gains and losses accumulated in equity are reclassified to profit or loss when the foreign operation is partially disposed of or sold.

#### 5.17 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The Chief Executive Officer is the chief operating decision-maker, responsible for allocating resources, assessing performance of the operating segments, and making strategic decisions.

#### **Financial risk management** 6

#### 6.1 Financial risk

The Group's activities expose it to a variety of financial risks, market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative instruments to hedge certain exposures.

Risk management is carried out by a central treasury department under policies approved by the Board of Directors. Group Treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units.

#### 6.1.1 Market risk

#### b) Cash flow and fair value interest rate risk

The Group manages interest rate risk by closely monitoring the trend of interest rates in the world's markets as well as in Thailand. The Group allocates its debt portfolio to either short-term and long-term contracts or loans with fixed and floating interest rates corresponding to their types of investments. The Company has chosen financial instruments to create an alternative source of funding and to manage its financial structure properly in which it invests. For example, interest rate swaps are being used to manage the proportion of fixed interest rates necessary to meet the market trends.

Interest rate of long-term loans from financial institutions and debentures of the Group was disclosed in Note 20 and 21, respectively.

The impact of interest rate hedging instruments on the Group's financial position and performance by entering currency and interest rate swap contracts was disclosed in Note 6.1.1 a) with the hedging of foreign exchange rate risk.

#### Sensitivity

Profit or loss is sensitive to higher or lower interest expenses from borrowings as a result of changes in interest rates from variable interest rate loan. Other components of equity changes as a result of an increase or decrease in the fair value of the cash flow hedges of interest rate swaps.

#### c) Price risk

The Group is exposed to coal and natural gas price risk which is fuel for electricity generation. To manage its coal price risk in the People's Republic of China which fluctuate from the domestic demand and supply, the Group monitors coal price index trends in order to plan an appropriate volume and price of coal purchase and adjusts the operation plan. To manage its natural gas price risk in the United States which fluctuate from the market price, the Group uses natural gas swaps to minimise its exposure to fluctuations in natural gas prices in its business operations.

In addition, the Group is exposed to electricity price risk in the United States since the spot price depends on demand and supply in the market and other factors, such as cost of fuel for electricity generation. The Group entered to electricity forward contracts and heat rate call options to maintain the ability to generate income.

Significant contracts

#### Nature gas swap contracts

As at 31 December 2024, the Group has outstanding natural gas swap contracts of 30,660,000 MMBTU at the average purchase price of US Dollar 3.10 per MMBTU (2023: 20,553,505 MMBTU at the average purchase price of US Dollar 3.52 per MMBTU). The contracts are due within 1 year.

Power fixed price contracts and heat rate call options

As at 31 December 2024, the Group has outstanding power fixed price contracts of 4,380,000 Megawatt hour (MWh) at the average selling price of US Dollar 46.71 per MWh (2023: 10,540,800 Megawatt hour (MWh) at the average selling price of US Dollar 43.39 per MWh) and heat rate call options for the capacity of 200 Megawatt (MW) (2023: 400 Megawatt (MW)). The Group receives option premium and power price which referred to natural gas price as specified in the option contracts. The contracts are due within 1 year.

#### 6.1.2 Credit risk

#### a) Risk management

The Group has no significant concentrations of credit risk. The Group has policies in place to ensure that sales of goods and services are made to customers with an appropriate credit history. Derivative counter parties and cash transactions are limited to high credit quality financial institutions. The Group has policies that limit the amount of credit exposure to any financial institution.

#### b) Impairment of financial assets

The Group and the Company has financia follows:

- Cash and cash equivalents
- Trade receivables
- Amounts due from related parties
- Loans to related parties

Expected credit losses for trade receivables and amount due from related parties was disclosed in Note 13 and Note 26. The impairment loss of other financial assets is not material.

#### 6.1.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the Group Treasury maintains flexibility in funding by maintaining availability under committed credit lines.

The Group and the Company has financial assets that are subject to the expected credit loss model as

056

The Group's financial liabilities into relevant maturity groupings based on their contractual maturities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Management monitors rolling forecasts of the Group's liquidity reserve cash and cash equivalents and undrawn borrowing facilities on the basis of expected cash flows. In addition, the Group's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets and maintaining financing plans.

#### 6.2 Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

#### 7 Fair value

The following table presents financial assets and liabilities that are measured at fair value, also stated fair value of each financial assets and liabilities, excluding financial assets and financial liabilities measured at amortised cost where the carrying value approximated fair value.

As at 31 December 2024

#### Assets

#### Financial assets

- Investment in debt instruments
- Note receivables issued by a financial institution
- Derivative assets
- Electricity forward contract
- Congestion revenue rights (CRR)
- Derivatives applied hedge accounting
- Electricity forward contract
- Natural gas swaps
- Cross currency and interest rate swaps

#### Liabilities

- Derivative liabilities
- Heat rate call options
- Electricity forward contract
- Hedging derivatives
- Electricity forward contract
- Natural gas swaps

#### Assets

#### Derivative assets

- Cross currency and interest rate swaps

Note receivables represent note receivables from sales of power and steam of subsidiaries in the People's Republic of China which are issued by a financial institution to guarantee the possessors to get money on the maturity date of note receivables. Note receivables are non-interest bearing.

There were no transfers between Levels 1, 2 and 3 of fair value level during the year.

Valuation techniques used to measure fair value level 2

Valuation techniques used to measure fair value level 2 are as follows:

- Fair value of debt instruments and note receivables is determined from discounted contractual cash flows where discount rate quoted in an active market.
- price on the statement of financial position date, with the resulting value discounted back to present value.
- The fair value of cross currency and interest rate swaps is calculated from the estimated future cash flows based on observable yield curves and forward exchange rates on the statement of financial position date, with the resulting value discounted back to present value.

#### Critical accounting estimates, assumptions and judgments 8

Estimates, assumption and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

#### 8.1 Impairment assessment of investments in subsidiaries, an associate, and joint ventures

The Group tested the impairment of investments in subsidiaries, an associate, and joint ventures when events or changes in circumstances would indicate that the carrying value of the investment is higher than its recoverable amount by applying the value-in-use model. The value-in-use model involves management's significant judgments with respect to the future operating results of the business, projected cash flows, and the appropriate discount rate to be applied to the projected cash flows. Key assumptions applied to the value-in-use model are electricity tariffs, the assumed capacity of the power plants, growth rate, expected changes to operating expenditures, and the discount rate to be applied to the projected cash flows.

#### 8.2 Fair value of certain financial assets and derivatives

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Group uses judgement to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period. The significant assumptions are disclosed in Note 7.

#### 8.3 Impairment of financial assets

The loss allowances for financial assets are based on assumptions about default risk and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs used in the impairment calculation, based on the Group's past history and existing market conditions, as well as forward-looking estimates at the end of each reporting period.

| Closing balance               | 16,922,840       | 19,969,730                    |  |  |

#### a) Addition of investment

On 14 June 2024, the Company additionally invested in Banpu Power US Corporation (BPPUS), a subsidiary, in the same proportion of shareholding, with a cost of USD 5 million or equivalent to Baht 183.11 million. The Company fully paid for this additional investment.

#### b) Decrease of investment

On 31 May 2024, the Board of Directors approved the capital reduction of Banpu Coal Power Ltd. The first capital reduction of Baht 70 million was carried out by offsetting with long-term loans from a related party of Baht 65 million, accrued interest expenses due to a related party of Bath 3.14 million and cash received of Baht 1.86 million. The second capital reduction of Baht 200 million was fully received in cash. The capital reduction was completed on 23 July 2024 and 25 September 2024, respectively.

#### c) Provision for impairment of investment

Banpu Power International Limited (BPPI), a subsidiary of the Company, is engaged in investing in the power generation business. It has an investment in Nakoso IGCC Management Co., Ltd. (NIMCO), a joint venture investing in the power generation business in Japan, with its investment solely in Nakoso IGCC Power Plant G.K. (Nakoso).

On 25 December 2024, NIMCO completed the sale of its entire shareholding in Nakoso at a sale price equivalent to Baht 1,151 million. As a result, NIMCO recognised a loss from the sale of Nakoso in its financial statements, and NIMCO has ceased its operations. The management considered this transaction as an indication that the investments in BPPI and NIMCO might be impaired, as BPPI's remaining investments are primarily in coal-fired power plants in China. Consequently, the management tested for impairment of these investments and calculated the recoverable amount using a value-in-use approach. The management's test results indicated that the recoverable amount of these investments was lower than their carrying amount. Therefore, the Company recognised an impairment loss for the investment in BPPI in the separate statement of comprehensive income for 2024, amounting to Baht 2,960 million. The Group recognised an impairment loss on its investment in NIMCO using the equity method for the remaining amount and transferred the ending balance of the cash flow hedge reserve and translation differences of NIMCO's financial statements, and the Group recognised an impairment loss on its investment in NIMCO using the ending balance of cash flow hedge reserve and translation differences of NIMCO's financial statements, and the group recognised an impairment loss on its investment in NIMCO using the ending balance of cash flow hedge reserve and translation differences of NIMCO's financial statements, and the Group recognised an impairment loss on its investment in NIMCO using the ending balance of cash flow hedge reserve and translation differences of NIMCO's financial statements, totalling Baht 1,621 million, in the consolidated statement of comprehensive income for the year ended 31 December 2024.

# d) Subsidiaries that has significant non-controlling interests

As at 31 December, the group had the following subsidiaries that has significant non-controlling interests as follows;

Deferred tax assets are recognised for tax loss carry forwards only to the extent that realisation of the related tax benefit through the future taxable profit is probable. The Group did not recognised deferred tax assets amounting to Baht 158.39 million from tax losses of Baht 791.96 million that could be carried forward against future taxable income, these tax losses will expire in 2028 (2023: The Group did not recognised deferred tax assets amounting to Baht 188.11 million from tax losses of Baht 940.56 million that could be carried forward against future taxable income, these tax losses will expire in 2027).

# 17.2 Income taxes

Income taxes for the years ended 31 December are as follows:

|                    | Consolidated finance | Consolidated financial statements |                  | Separate financial statements |  |
|--------------------|----------------------|-----------------------------------|------------------|-------------------------------|--|
|                    | 2024<br>Baht'000     | 2023<br>Baht'000                  | 2024<br>Baht'000 | 2023<br>Baht'000              |  |
| Current tax        | 32,364               | 146,784                           | -                | -                             |  |
| Withholding tax    | 159,971              | 56,739                            | -                | 49,624                        |  |
| Deferred tax       | 139,455              | 198,939                           | (2,834)          | 5,645                         |  |
| Total income taxes | 331,790              | 402,462                           | (2,834)          | 55,269                        |  |

The tax on the Group's profit before taxes differs from the theoretical amount that would arise using the basic tax rate of the home country of the company as follows:

|   | Consolidated finan | Consolidated financial statements |                  | cial statements  |  |

Weighted average tax rate of the Group is 16.24% (2023: 5.88%).

In December 2021, the Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules to reform international corporate taxation that aim to ensure that large multinationals pay a minimum effective corporate tax rate of 15% in each jurisdiction in which they operate. Under the legislation, the Group is liable to pay a top-up tax for the difference between its GloBE effective tax rate in the jurisdiction of the Group and the 15% minimum rate.

The Group is within the scope of the Pillar Two model rules. In 2024, Pillar Two legislation was enacted in Thailand, the jurisdictions in which the Company is incorporated, and will come into effect on 1 January 2025. The Pillar Two legislation wasn't effective at the reporting date, so the Group has no related current tax exposure. The Group has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes as provided in TAS 12.

The Group is assessing its exposure to the Pillar Two legislation for when it comes into effect. The Group is currently engaged with tax specialists to prepare and assess the impact in applying the Pillar Two model rules.

# 18 Short-term loans from financial institutions

#### Consolidated financial statements

As at 31 December 2024, the Group had short-term loans from financial institutions amounting to Baht 5,050 million. (2023: the Group had short-term loans from financial institutions amounting to Baht 2,000 million and CNY 81.90 million or equivalent to Baht 393.68 million). These loans bear interest at the rates of 2.50 % to 2.86 % per annum (2023: 2.73% to 4.00% per annum) and due for repayment within one year.

#### Separate financial statements

As at 31 December 2024, the Company had short-term loans from financial institutions amounting 5,050 million (2023: the Company had short-term loans from financial institutions amounting to Baht 2,000 million). This loan bear interest at the rates of 2.50% to 2.86% per annum (2023: 2.73% to 2.74% per annum) and due for repayment within one year.

The fair value of short-term loans from financial institutions approximates their carrying amount, as short-term loans from financial institutions had a short period of maturity.

# **19 Other current liabilities**

As at 31 December, other current liabilities consist of:

\* The interest rates are adjusted from time to time upon the change of money market rate.

The fair values of long-term loans to related parties are based on discounted cash flows using a discount rate based upon the market borrowing rate as at the reporting date and are within level 2 of the fair value hierarchy. As at 31 December 2024 and 2023, the fair values of long-term loans to related parties approximated their carrying amount.
